Bioenergetics
(including Reviews on Bioenergetics)
Vol. 1100, 1992

Cumulative Contents

Regular Papers

Is bicarbonate in Photosystem II the equivalent of the glutamate ligand to the iron atom in bacterial reaction centers?
X. Wang, J. Cao, P. Maróti, H.U. Stilz, U. Finkele, C. Lauterwasse, W. Zinth, D. Oesterhelt, Govindjee and C.A. Wraight (USA, Germany) 1

Spectral identification of the electrochromically active carotenoids of *Rhodobacter sphaeroides* in chromatophores and reconstituted liposomes
W. Crielaard, F. Van Mourik, R. Van Grondelle, W.N. Konings and K.J. Hellingwerf (Netherlands) 9

The flash-induced turnover of cytochrome *b*-563, cytochrome *f* and plastocyanin in chloroplasts. Models and estimation of kinetic parameters
A.B. Hope, R.R. Huilgol, M. Panizza, M. Thompson and D.B. Matthews (Australia) 15

The role of the mitochondrial creatine kinase system for myocardial function during ischemia and reperfusion
S. Soboll, A. Conrad, M. Keller and S. Hebisch (Germany) 27

Electron transfer from excited tryptophan to cytochrome *c*: mechanism of phosphorescence quenching?
V. Dadak, J.M. Vanderkooi and W.W. Wright (Czechoslovakia, USA) 33

Rates of cyanide binding to the catalytic intermediates of mammalian cytochrome *c* oxidase, and the effects of cytochrome *c* and poly(L-lysine)
R. Mitchell, S. Brown, P. Mitchell and P.R. Rich (UK) 40

The reaction-centre associated cytochrome subunit of the purple bacterium *Rhodocyclus gelatinosus*
W. Nitschke, I. Agalidis and A.W. Rutherford (France) 49

A new way to monitor by-pass restorations of electron transport in inhibited chloroplasts by cyclic electron flow cofactors – A study by modulated fluorimetry
G. Braun, A.R.J. Driesenaar, S. Malkin and A. Trebst (Israel, Germany) 58

Determination of the position of the $Q_i^{\cdot -}$ quinone binding site from the protein surface of the cytochrome bc_1 complex in *Rhodobacter capsulates* chromatophores
S.W. Meinhardt and T. Ohnishi (USA) 67

Characterization of light-activated reversible phosphorylation of a chlorophyll *a*/*b* antenna apoprotein in the photosynthetic prokaryote *Prochlorothrix hollandica*
A.F. Post, A. Gal, I. Ohad, K.M. Milbauer and G.S. Bullerjahn (Israel, Netherlands, USA) 75

Restoration of irradiance-stressed *Dunaliella salina* (green alga) to physiological growth conditions: changes in antenna size and composition of Photosystem II
M.A. Harrison, A. Melis and J.F. Allen (UK, USA) 83

Stabilisation of PS-II-mediated electron transport in oxygen-evolving PS II core preparations by the addition of compatible co-solutes
W.P. Williams and K. Gounaris (UK) 92

The energetic state of the thermogenic appendix of the voodoo lily inflorescence. A ^{31}P-NMR study
H. Skubatz, C.D. Hardin, R.W. Wiseman, B.J.D. Meeuse and M.J. Kushmerick (USA) 98

Rapid Report

Oxidation-reduction properties of the ferredoxin-linked glutamate synthase from spinach leaf
M. Hirasawa, D.E. Robertson, E. Ameyibor, M.K. Johnson and D.B. Knaff (USA) 105

Review

Evolution of organellar proton-ATPases
N. Nelson (USA) 109

Regular Paper

The structure of Photosystem I from the thermophilic cyanobacterium *Synechococcus* sp. de-

termined by electron microscopy of two-dimensional crystals
B. Böttcher, P. Gräber and E.J. Boekema (Netherlands, Germany) 125

Creatine kinase binding and possible role in chemically skinned guinea-pig taenia coli
J.F. Clark, Z. Khuchua and R. Ventura-Clapier (France, Russia) 137

ATPase sites in two-headed fragment of *Tetrahymena* 22S ciliary dynein
Y. Niino and T. Miki-Noumura (Japan) 146

Spectrophotometric detection of the interaction between cytochrome *c* and heparin
M. Antalík, M. Bona, Z. Gažová and A. Kuchár (Czechoslovakia) 155

Pleiotropic effects of *pufX* gene deletion on the structure and function of the photosynthetic apparatus of *Rhodobacter capsulatus*
T.G. Lilburn, C.E. Haith, R.C. Prince and J.T. Beatty (Canada, USA) 160

Multichannel circular dichroism investigations of the structural stability of bacterial cytochrome *P*-450
B. Nölting, C. Jung and G. Snatzke (Germany) 171

The inhibition of photosynthetic oxygen evolution by ammonia probed by EPR
L.-E. Andréasson and K. Lindberg (Sweden) 177

Spectroscopic studies of *Rhodobacter capsulatus* cytochrome *c'* in the isolated state and in intact cells
F. Monkara, S.J. Bingham, F.H.A. Kadir, A.G. McEwan, A.J. Thomson, A.G.P. Thurgood and G.R. Moore (UK) 184

The ionic strength of the intermembrane space of intact mitochondria is not affected by the pH or volume of the intermembrane space
J.D. Cortese, A.L. Voglino and C.R. Hackenbrock (USA) 189

The influence of the double reduction of Q_A on the fluorescence decay kinetics of Photosystem II
F.J.E. Van Mieghem, G.F.W. Searle, A.W. Rutherford and T.J. Schaafsma (France, Netherlands) 198

Spectroscopic characterization of photoinhibited Photosystem II and kinetic resolution of the triggering of the D_1 reaction center protein for degradation
K.J. Van Wijk, B. Andersson and S. Styring (Sweden) 207

Review

Malate dehydrogenase isoenzymes: Cellular locations and role in the flow of metabolites between the cytoplasm and cell organelles
C. Gietl (Denmark) 217

Regular Papers

Enzyme inactivation by metal-catalyzed oxidation of coenzyme Q_1
A. Mordente, G.E. Martorana, E. Meucci, S.A. Santini and G.P. Littarru (Italy) 235

Laser-induced optoacoustic calorimetry of cyanobacteria. The efficiency of primary photosynthetic processes in state 1 and state 2
D. Bruce and O. Salehian (Canada) 242

Isolation and characterization of oxygen-evolving Photosystem II membranes from the cyanobacterium *Synechocystis* 6803
F. Nilsson, K. Gounaris, S. Styring and B. Andersson (Sweden, UK) 251

Spectroscopic characterization of B820 subunits from light-harvesting complex I of *Rhodospirillum rubrum* and *Rhodobacter sphaeroides* prepared with the detergent *n*-octyl-*rac*-2,3-dipropylsulfoxide
R.W. Visschers, R. Nunn, F. Calkoen, F. Van Mourik, C.N. Hunter, D.W. Rice and R. Van Grondelle (Netherlands, UK) 259

Characteristics of the non-exchangeable nucleotide binding sites of mitochondrial F_1 revealed by dissociation and reconstitution with 2-azido-ATP
A.F. Hartog, C.M. Edel, F.B. Lubbers and J.A. Berden (Netherlands) 267

Fluorescence of P700 and antenna chlorophylls in Photosystem I particles that contain 11 chlorophylls/P700
M. Iwaki, M. Mimuro and S. Itoh (Japan) 278

Excitation energy transfer from phycobilisomes to Photosystem I in a cyanobacterium
C.W. Mullineaux (UK) 285

Deletion of antenna chlorophyll-*a*-binding proteins CP43 and CP47 by Tris-treatment of PS II membranes in weak light: Evidence for a photo-degradative effect on the PS II components other than the reaction center-binding proteins
H. Mori and Y. Yamamoto (Japan) 293

Regulation by localized protons of Photosystem II photochemical efficiency
A.M. Ehrenheim, A. Vianelli, G. Finazzi and G. Forti (Italy) 299

Transient peroxide formation by the manganese-containing, redox-active donor side of Photosystem II upon inhibition of O_2 evolution with lauroylcholine chloride
G. Ananyev, T. Wydrzynski, G. Renger and V. Klimov (Russia, Germany) 303

Damage to functional components and partial degradation of Photosystem II reaction center proteins upon chloroplast exposure to ultraviolet-B radiation
A. Melis, J.A. Nemson and M.A. Harrison (USA) 312
Ruthenium red affects the intrinsic fluorescence of the calcium-ATPase of skeletal sarcoplasmic reticulum
M.-J. Moutin, C. Rapin and Y. Dupont (France) 321
Glutamine affects glutamate metabolism in isolated rat kidney cortex mitochondria
W.S. Kunz, L. Krinelke and F.N. Gellerich (Germany) 329
The relation between the soluble factor associated with H^+-transhydrogenase of *Rhodospirillum rubrum* and the enzyme from mitochondria and *Escherichia coli*
I.J. Cunningham, R. Williams, T. Palmer, C.M. Thomas and J.B. Jackson (UK) 332
Cumulative Contents, Vol. 1100 339
Author Index 343
